INTRODUCING **BROADVOICE** — **zapier**

The ultimate tool for automating your workflows and streamlining your communications.

Broadvoice Zapier Integrations lets you **connect Broadvoice to thousands of popular apps** so you can automate your work and have more time for what matters most.

With Zapier, you can **connect Broadvoice to over 5,000 commercial applications**, including popular tools such as Dropbox, Google Drive, Zendesk, Slack, and Gmail, without needing to hire a developer.

Zapier is the magic wand that connects you with your apps while **removing inefficiencies and helping your businesses grow**.

The Zapier integration puts the power of Zapier and the communication flexibility and business telephony data of Broadvoice into thousands of apps.

Here are some of the automations you can create with **Broadvoice Zapier Integrations**:

- Log calls in Google Sheets in real-time
- Log new text messages and images as a note in Zendesk Sell
- Create ReadyCloud Suite contact notes for missed calls
- Create Zendesk tickets from new SMS messages
- Send an email for Broadvoice voicemails
- Archive call recordings in Dropbox
- Send a Slack message for new SMS messages
- Log received faxes in Google Sheets
- Send faxes to Dropbox for storage and archiving
- Add contacts to Google Contacts with a phone line validated by Phone Validator when a call is missed

Create custom workflows, automate repetitive tasks, and **save time** with our easy Zapier integration.
